

2017 **BUCKEYE** WHEAT HYBRIDS

As we enter the fall we hope that you will keep us in mind for your seed wheat needs. We have four **excellent** wheat varieties for sale. We are very excited about our new variety "Meyer". This mid season variety is tops in yield. Our Barrett wheat is as good as it gets for a very early variety. Our Hosket remains very dependable for yield and straw production.

MEYER-NEW! - This new variety has great eye appeal. It has medium height with a smooth head. A great mid-season choice with high yield and excellent test weight.

BARRETT- This very early smooth wheat is ideal for double cropping. It has an excellent disease package including good resistance to head scab. It has medium height with excellent standability making it a good candidate for high management.

HOSKET - Excellent grain and straw yield. Great disease package and adapts well to various soil types. Early maturity and baling potential make this a good option for livestock producers and farmers who want to double crop.

STARBURST-NEW! - This new smooth variety has excellent test weight. It has very short height, with excellent straw strength.
