Comment	Strong performance in dark and light soils. Excellent emergence and very good standability.	Excellent standability & performance in light and dark soils. Very good in narrow rows, but works well in all row widths.	Excellent emergence with impressive seedling vigor. Good no-till option with strong performance record.	Tall bean with good lodging scores. Adapts well to tougher soils as well as highly productive dirt.	Bushy type bean with excellent standability. Fast emergence with good adaptation to no-till.	Tough bean that performs well in dark and light soils. Performs in all row widths, but excels in narrow rows.	Excellent emergence and strong early vigor. Great product for more productive soils. Excellent standability.

Comment	Strong performance on dark & light soils. Excellent emergence and vigor.	Works well in narrow and wide rows. Performs well on high ground and more productive soils. A very popular variety for us.	Rugged plant with very good stress tolerance. Has good adaptation to both the lighter and darker soils.	Excellent emergence and vigor. Provides a full canopy for wider row soybeans. Best adaptation is in the more productive soils.	A medium bushy bean with very good emergence and standability.	Excellent emergence. Strong yield potential and nice standability.	Very good emergence and excellent standability. An improved variety compared to public variety Dennison.
