

**PS 2294 LLGT – NEW! 2.9 RM**

- **Yielded 54.3 Bu/A in 2019 Ada replicated trials; planted June 8<sup>th</sup>**
- Excellent Phytophthora Root Rot (PRR) field tolerance
- Excellent emergence and good standability
- Large advantage vs key LL checks at this RM
- Good SDS tolerance

**PS 2337 LLGT 3.3 RM**

- **Yielded 53.8 Bu/A in 2019 production fields, planted June 27 & 28**
- Medium-tall variety with good lodging score
- Rugged bean that can adapt to different soil types
- Excellent emergence
- Nice yield advantage vs key LL checks in 2017 & 2018
- Strong Soybean Cyst Nematode (SCN) field tolerance

**PS 2353 LLGT-NEW! 3.5 RM**

- **Yielded 56.5 Bu/A in 2019 production field; planted June 25<sup>th</sup>**
- Impressive yield potential and stress tolerance
- Very good Sudden Death Syndrome tolerance
- Very good emergence and standability
- Strong yield advantage vs most current LL varieties
- Very good Phytophthora Root Rot (PRR) field tolerance
