

PS6265 X2 2.6 RM

- Yielded 62.3 Bu/A in 2019 production fields; planted June 7th
- Rugged bean with strong yields at this RM
- Very good emergence and standability
- Very good Phytophthora tolerance
- Demonstrated yield stability in low and high yield environments

PS6276 X2 2.7 RM

- Yielded 60.2 Bu/A in 2019 production fields; planted June 8th
- Excellent emergence
- Adapts well to light and dark soils
- Very good standability
- Excellent Phytophthora Root Rot (PRR) field tolerance
- Excellent Sudden Death Syndrome (SDS) tolerance

PS6313 X2 3.1 RM

- Yielded 58.0 Bu/A in 2019 production fields; planted June 12th
- Rugged bean with excellent stress tolerance
- Medium-tall, bush type bean
- Excellent emergence
- Excellent Phytophthora Root Rot (PRR) field tolerance

PS6337 X2 3.3 RM

- Yielded 58.1 Bu/A in 2019 Ada replicated trial; planted June 8th
- Excellent stress tolerance and yield potential
- Excellent frog-eye and Soybean Cyst Nematode resistance
- Very good Phytophthora Root Rot (PRR) field tolerance
- Excellent emergence and very good standability

PS635 X2 3.5 RM

- Excellent standability
- Bushy type bean
- Very good Phytophthora Root Rot (PRR) field tolerance
- Very good Sudden Death Syndrome (SDS) tolerance

PS6369 X2 3.6 RM

- **Yielded 54.4 Bu/A in 2019 production fields; planted June 14th**
- Works in all row widths, but excels in narrow rows
- Performs well in light and dark soils
- Excellent Phytophthora Root Rot (PRR) field tolerance
- Strong Sudden Death Syndrome (SDS) tolerance
- Takes tough conditions

PS6375 X2 3.7 RM

- Bush bean with very high yield potential
- Strong performance in Ohio soils
- Excellent Phytophthora Root Rot (PRR) field tolerance
- Very good Sudden Death Syndrome (SDS) tolerance
