

2027 Corn Agronomic Ratings - Conventional

Brand No.	Trait	RM	Ear Type	Comments	Staygreen	Northern Corn Leaf Blight	Gray Leaf Spot	Tar Spot
4515	 Non-Traited	105	Semi-flex	Semi-flex, girthy ear with fast drydown. Very good stalk and root strength. Great choice for dry corn during the early harvest.	A	G	G	A
4568	 Non-Traited	105	Semi-flex	Flex ear hybrid with nice girth and impressive fall appearance at the 105 RM maturity. Much improved disease tolerance at this maturity.	G	G	G	G
4704	 Non-Traited	107	Semi-flex	Impressive yielding product with very good test weight and a strong disease package. Great performance in 2025.	G	VG	G	VG
4780	 Non-Traited	108	Semi-flex	Very good tolerance to key leaf diseases. Nice ear, very good test weight, and great agronomics. Strong performance in wetter soils.	VG	G	VG	VG
4817	 Non-Traited	108	Semi-flex	Large ears with open husks. Very good stalks with attractive fall appearance and nice grain quality. Star performer in our 2025 performance trials.	G	G	G	A-G
5023	 Non-Traited	110	Semi-flex	Very good tolerance to key leaf diseases and has shown strong standability. Strong performance across soil types and years.	G	VG	VG	VG
5183	 Non-Traited	111	Semi-flex	Product with very high yield potential and very good standability. Good tolerance for Northern Corn Leaf Blight and nice test weight.	VG	VG	G	A-G
5396	 Non-Traited	113	Flex	Large girthy ear, big plant structure, and high yield potential. Silage “king” with high tonnage and excellent digestibility.	G	G	G	A
